

## Know Your Device

## Quick Start

Remove the heat-insulated cap, and load the chamber with concentrates.

Quickly click the button 5 times to turn on the device, then click 3 more times to circle through voltage settings and select the voltage you prefer.

## Indicator Codes

Turn On/Off: Light flashes 5x times. The Light color is based on current voltage level.

Chamber Connected: The light is solid for 1s. The light color is based on the current voltage level.

Switching Voltage Settings: Light solid for 1s. The Lights color is based on the current voltage level.

Working: Light breathes in color of currents voltage level.

Vaping Overtime (20/30s): light flashes 5x times. The light color is based on current battery life.

Charging: The light breathes in color of current battery life.

Fully Charged: Light off.

Short Circuit: 4 red light flashes.

Open Circuit: 3 white light flashes.

Low Voltage: 10 red light flashes.

## Dab Pen Mode

Assemble the OIL STAR as show below.

Place your concentrate medication into the atmoizer and replace the top glass mouthpiece. Start up your OIL STAR and watch for the indicator light which breathes when the device is working.

Twist off the airflow controlling unit and WPA, and screw the glass mouthpiece on the top and airflow controlling unit on the bottom.

## eNail Mode

Assemble the OIL STAR as shown below.

Insert your OIL STAR into the female joint of your water pipe.

Click the button twice or hold the button down to heat up your atomizer (nail)

The OIL STAR indicator light breathes when the device is working. Wait 2-3 seconds and then inhale to consume concentrate medication. Press the airflow control unit (carb cap) to let more air in when needed.

## Nector Collector Mode

Assemble the OIL STAR as show below.

The OIL STAR indicator light breathes when the device is working. Touch hot nector collector tip onto concentrate to consume your medication.

## Cleaning Oil Star Unit & Parts

• Heating Chamber: Clean it with DAB WIPES brand cotton swabs in 99% isopropyl alcohol, or soak it in 99% isopropyl alcohol. Dry it completely and heat it with the device to vaporize all the residuals.

• Battery: Turn off the battery. Remove the connect ring, then clean it and the battery with q-tip or alcohol pad.

• Airflow Path: Turn off the battery. Clean it with cleaning brush dipped in isopropyl alcohol.

• Glass Mouthpiece, Airflow Controlling Unit, WPA, Nector Collector Tip & Heat Insulated Cap: Soak it in 99% isopropyl alcohol and dry it completely.

## Switching Between Modes

USE the description and photos under each mode to help you determine how to assemble your OIL STAR. Our design allows for various methods to be used depending on your application.

## Warning

- The device is ONLY intended for use with concentrates.
- Do NOT use the device while charging.
- Do NOT touch the heating chamber when using or right after using. Allow several minutes for the chamber to cool down after using.
- Clean the device regularly.
- Do NOT overload the chamber.
- Do NOT dry fire the chamber consecutively.
- Keep the device away from any environment with high temperature, high humidity, flammable or combustible materials, strong acids, water or other liquid.
- Keep away from any person under legal smoking age, and pets.
- Improper use, disassembly, or modifications to the device voids the warranty and could cause damage or physical harm.
